Historians think Herod died in 4 BC, a belief derived partly from details in the "Jewish Antiquities" written by Josephus. He reported that Herod died shortly before the annual Jewish Passover and shortly after a lunar eclipse - the only one noted in Josephus' massive work. Modern calculations show

The Holy Land had a total lunar eclipse  
in 1 B.C. and two total eclipses in 5 B.C.

plus a partial eclipse in 4 B.C.

Another authority says L. Mark says  
that now 27d. between the 4 B.C. eclipse and

person, making very close to my way  
the many great figures depicted after

Herod's death could be arranged into 29d

He also talks out the 5 B.C. eclipse knowing only  
the 1 B.C. eclipse. However, the Antiquities

of Josephus (I have access) died in 90 A.D. of

Tuberculosis. That would put Herod's death at Philip's

accession at 4 B.C.
